IREM Managing Newly Constructed Facility

Adams Street Self Storage in Manchester, CT, opened its doors in August. The facility is one of the few facilities in the country where you can enter on one major highway, drive through the facility, and exit onto another major highway. This unique parcel of land in the suburbs of Hartford contains a three-story climate controlled building and is flanked by two single-story drive up access buildings on either side, which takes advantage of the galley layout of the property. Adams Street Self Storage contains 572 units and 81,275 SF. This facility also boasts a “customizable storage experience” with optional shelving, lighting, and sizing options. Investment Real Estate Management is managing the operations and marketing of the store. Alyssa Quill, Vice President of Operations, says, “We look forward to a successful lease up with two highly regarded property managers who moved to CT for this new challenge.”

IREM currently manages over 45 self storage properties for third parties in six states. The Investment Real Estate Group of Companies provides self storage brokerage, construction, management and consulting services to owners and investors in the Mid-Atlantic and Northeastern United States. For more information, contact Julie Lane Purcell at (717) 779-0804 or visit www.irellc.com.
